

What Would I do?

- I would like to encourage the colleges use of the careers service and promote the student body to use the resources available to us!
- There are issues with the college library, I would like to resolve the issues with renewing books when graduate students are working at the weekends and evenings.
- I would like to start a drop in session provided by the careers service in collage to make it easier for people to discuss their futures and think beyond the Oxford bubble.

Why me?

I am aware of academic issues that face students and would like to promote communication between the students and the college academics.
I have had reason to be in direct contact with college exams entrance team and am keen to use my knowledge to help with students with special exam requirements.

Robin for Careers & Academic Affairs

I'M A SECOND YEAR BIOLOGIST

Despite my burning desire (well sort of) to hust I am unfortunately in Tenerife for the next week on a field trip!
